28 pin SO (or PLCC) socket/40 pin DIP 0.6" plug

Supported Device/Footprints

Using one of these adapters, the Atmel T89C51CC02 in either SOIC or PLCC package can be programmed using the 40 pin DIP footprint specified by Atmel.

For this adapter to be useful, a programmer must offer specific support for this device and adapter combination.

Atmel: AT89C51CC02 PLCC28 or SO28

Footprint: Atmel specified 40 DIP 0.6"

Adapter Construction

These adapters are made up of 2 sub-assemblies. They assemble via connectors making the adapter modular. This way the sub-assemblies can be replaced easily.

When disassembling the adapter take care not to bend the pins. When reassembling the adapter note the pin 1 indicators to align the parts correctly.
